

Customized Ceramic Products

Catalog No. 90000-0001-000 0411

Customized Ceramic Products

- Special customized ceramic parts.
- High precision & accuracy for flatness, parallelism, concentricity and surface quality requirements.
- Variety of geometry capabilities, such as holes as small as .001" with tolerances of $\pm .00004$ ".
- Utilizing high quality ceramic powders of aluminum oxide and zirconium oxide or mixtures of both elements.
- Assemblies of steel and ceramic parts.
- Unique and efficient approach to the challenges of the different industries.
- Providing Hi-Tech solutions for the micro precision fabrication.
- For various applications: Semiconductor, Ink-Jet and Aerospace Industries.
- Best cost performance solution.
